This document is intended to help teachers review their student baseline data and to identify trends in student performance prior to writing their SLO(s). Teachers should identify the content standards of the course and then match any relevant assessment or baseline data available that demonstrates students' background knowledge and skill set related to each standard. Based upon the evidence from baseline data, teachers can use this tool to identify student strengths and weaknesses and use the data to improve the creation of growth targets.

Teacher: $\qquad$
Grade/Subject: $\qquad$
Standards Used: $\qquad$
School/District Priorities:

| Content Standard(s) <br> (The actual number of the standard <br> and/or the expectation/topic of that <br> standard) | Assessment or Baseline Data <br> (Includes name of assessment, if it is a <br> state assessment or commercially <br> available assessment, and a description <br> of the assessment) | Evidence <br> (Summary of the assessment results <br> including the range of scores, percentage <br> of students that answered questions <br> correctly, etc.) | Subgroups to Note <br> (Note performances of groups of <br> students, either groups of students that <br> performed lower than others on a <br> particular skill or a subgroup that scored <br> exceptionally well) |
